Greetings, Teachers and Students!!

This message is to hereby inform you all regarding the summer course being organized by the **Computer Science Club.**
The following course will teach you the basics of ***Web Designing with Wix****.* '
FREE OF COST!

Don't know how to code? Have no coding Experience? Want to build websites?
Join our course

With Wix, students can skip the setup and go straight into development of web tools and applications — with no prior knowledge of web designing also you can walk straight into development of web tools and applications
This course consists of 10 lessons and 1 project.

Each lesson comes with a detailed lesson plan, a slideshow based on the lesson, and a hands-on activity using Developer Mode in the Wix Editor. This course is meant to be instructor-led and project-based, where students spend the first portion of each lesson learning new concepts and ideas together, then try out these new concepts with hands-on activity, and end by sharing and reflecting on their explorations.

The course will be held during the summer vacation, **with two classes per week which will be of 1 hour each.**

Date- May 21 - June 20
Days- Monday and Wednesday
Timings- 2pm - 3pm
Mode- Online

Certificates will be provided to all students who complete the course, attend all classes and submit the project.
